PROFESSIONAL SUMMARY

Highly focused and product-driven Computer Science student (Expected 2028) with hands-on experience operating as a sole engineer in a startup environment. Possesses a strong aptitude for reverse engineering, deep-diving into complex codebases, and automating workflows to maximize development speed. Proven track record in full-stack architecture, AI integration, and security analysis. Seeking a software engineering internship or entry-level role to leverage intense debugging capabilities and a passion for building robust, secure, and efficient applications.

EDUCATION

Babasaheb Bhimrao Ambedkar University

Bachelor of Technology in Computer Science

Sainik School Chittorgarh

High School Education (Focus in Python & Programming)

Lucknow, Uttar Pradesh

2024 – Expected July 2028

Chittorgarh, Rajasthan

2022 – 2024

EXPERIENCE

Software Engineer

June, 2025 – July, 2026

Jiva.

Remote / Lucknow

- Spearheaded the end-to-end development of an AI-integrated reading application using Flutter, successfully taking over and stabilizing the codebase from an external agency.
- Architected a robust backend architecture using Node.js, Express, and WebSockets to enable seamless, real-time data communication.
- Integrated advanced AI capabilities directly into the application, implementing document search and user intent classification.
- Engineered the complete deployment infrastructure by setting up AWS servers and automating CI/CD pipelines via GitHub Actions.
- Implemented secure user authentication, account management, and database solutions utilizing Firebase.
- Designed and deployed the company's official website from scratch using HTML and CSS, fully managing their online web presence.

PROJECTS & SECURITY ANALYSIS

Security Analysis & Bug Bounty Hunting | *Linux, Custom Shell Scripts*

- Conducted deep-dive security assessments and tracing on various applications to identify vulnerabilities and reverse-engineer core functionalities.
- Developed custom Linux shell scripts alongside standard security tools to automate the tracing process and increase the speed of vulnerability discovery.
- Leveraged advanced debugging and code-reading capabilities to analyze and understand complex, third-party codebases.

Omnori | *Product Ecosystem – JavaScript, C#, Shell* | omnori.github.io

- Building and shipping a suite of open-source productivity tools under one brand: **Nori Cam** and **Pomori** (Chrome extensions for video calls and Pomodoro timing), **Notes 101** (an AI Discord bot that transcribes voice meetings into notes), **Dark Moon** (a native Windows/Linux display brightness utility), and **Nori Scrapes Images** (a Chrome extension for bulk product-image scraping).

Frontend Portfolio | *HTML, CSS, JavaScript*

- Designed and built over 20 distinct frontend user interfaces, including modern client-facing school and NGO websites, to master responsive design, cross-browser compatibility, and modern web environments.

TECHNICAL SKILLS

Languages: JavaScript, Java, Dart, Python, C++, C, C#, HTML, CSS, Shell Scripting, MySQL

Frameworks & Backend: Flutter, Node.js, Express

Infrastructure & Tools: AWS, GitHub Actions (CI/CD), Firebase, WebSockets, VS Code, Linux

Core Competencies: Full-Stack Development, AI Integration, Reverse Engineering, Bug Bounty/Security, DevOps, Automation

Spoken Languages: English, Hindi, Japanese
