PROFESSIONAL SUMMARY

Highly focused and product-driven Computer Science student (Expected 2028) with hands-on experience operating as a sole engineer in a startup environment. Possesses a strong aptitude for reverse engineering, deep-diving into complex codebases, and automating workflows to maximize development speed. Proven track record in full-stack architecture, AI integration, and security analysis. Seeking a software engineering internship or entry-level role to leverage intense debugging capabilities and a passion for building robust, secure, and efficient applications.

EDUCATION

Babasaheb Bhimrao Ambedkar University

Bachelor of Technology in Computer Science

Lucknow, Uttar Pradesh

2024 – Expected July 2028

Sainik School Chittorgarh

High School Education (Focus in Python & Programming)

Chittorgarh, Rajasthan

2022 – 2024

EXPERIENCE

Software Engineer

June, 2025 – July, 2026

Jiva.

Remote / Lucknow

- Spearheaded the end-to-end development of an AI-integrated reading application using Flutter, successfully taking over and stabilizing the codebase from an external agency.
- Architected a robust backend architecture using Node.js, Express, and WebSockets to enable seamless, real-time data communication.
- Integrated advanced AI capabilities directly into the application, implementing document search and user intent classification.
- Engineered the complete deployment infrastructure by setting up AWS servers and automating CI/CD pipelines via GitHub Actions.
- Implemented secure user authentication, account management, and database solutions utilizing Firebase.
- Designed and deployed the company's official website from scratch using HTML and CSS, fully managing their online web presence.

PROJECTS & SOFTWARE ENGINEERING

Omnori Ecosystem | *Cross-Platform Development (JavaScript, C#, Shell)* | omnori.github.io

- Architected and deployed a multi-platform suite of open-source productivity applications, managing the full software development lifecycle from concept to release.
- Engineered multiple Chrome extensions (**Nori Cam**, **Pomori**, **Nori Scrapes Images**) utilizing advanced DOM manipulation, background service workers, and browser API integration.
- Developed **Notes 101**, an AI-integrated Discord bot for automated voice-to-text transcription, and **Dark Moon**, a native Windows/Linux system utility for hardware-level display control.

Security Engineering & System Automation | *Linux, Shell Scripting, Reverse Engineering*

- Analyzed and reverse-engineered third-party applications to identify vulnerabilities, demonstrating a deep understanding of application architecture and execution flow.
- Engineered custom Linux shell scripts to automate diagnostic testing and vulnerability tracing, significantly reducing the time required for security assessments.
- Applied advanced debugging and system profiling capabilities to safely interact with, deconstruct, and understand complex, undocumented codebases.

Frontend Web Development | *HTML, CSS, JavaScript, UI/UX Architecture*

- Developed and deployed over 20 responsive web applications, including scalable, client-facing platforms for educational institutions and NGOs.
- Implemented modern frontend architectures emphasizing cross-browser compatibility, web performance optimization, and interactive user experiences.

TECHNICAL SKILLS

Languages: JavaScript, Java, Dart, Python, C++, C, C#, HTML, CSS, Shell Scripting, MySQL

Frameworks & Backend: Flutter, Node.js, Express

Infrastructure & Tools: AWS, GitHub Actions (CI/CD), Firebase, WebSockets, VS Code, Linux

Core Competencies: Full-Stack Development, AI Integration, Reverse Engineering, Bug Bounty/Security, DevOps, Automation

Spoken Languages: English, Hindi
